

WEB DEVELOPMENT WEDE5020

MY TWO PROPOSALS FOR A WEBSITE

For this TASK, you are required to select two (2) organisations that could benefit from having a new or improved website.

First organization will be:

Josh H_InkStudio

https://www.instagram.com/h_inkstudio?igsh=MWg4bWRscGVqdm1qaw==

Category:

It's a small business as he is a sole owner.

What is the organisation about?

It's a tattoo studio where you can make an appointment with the artist and get you a tattoo for a reasonable price according to the size you want. He does his own designs, or you can come with your own, he does offer giveaways and discounts very frequently by interacting with followers on social media (specifically Instagram), where if you share and like certain posts, you'll win a discount or free tattoo. The target audience for this organization could be anyone who loves art or would like to express themselves in a different way, get something tattooed on their body that holds genuine meaning to them.

Does the organisation currently have a website?

The small business does not have a website, only a social media account on Instagram.

Motivation for Choosing this organisation

Explain why you selected this organisation.

My motivation behind choosing this organization is purely due to the fact that it would really benefit from a better online presence, as not everyone has Instagram so having a website would draw even a wider market of customers who would love to get tattoos. The inclusion of a website would make appointments much easier as you don't have to message the artist directly but rather make an appointment on an online calendar which shows available dates that the artist is free while also paying a deposit to secure your booking. There will also be tabs/pages that showcases all the previous tattoos he has done (to show his work) and inspiration designs to cater the customer who is not quite sure what to get yet.

Second organization will be my dad's company:

Freeman's Aluminum

Category:

Small business

What is the organisation about?

The business is all about manufacturing and installing any aluminum architectural components such as windows, doors, shower doors, side lights. He has a group of a few workers who manufacture these components and then install them at businesses, customers' houses, schools, etc. The service offered also includes fixing broken windows (glass) and replacing them with a proper one. The target audience is anyone who wants to upgrade their home/business/school from wooden or steel frames to aluminum doors and windows that give their property a great look and lift the property value in the process.

Does the organisation currently have a website?

No, the organization does not have a website nor does it have a social media page, it got popular by word of mouth and lots of recommendations, still does extremely well for almost 20 years.

Motivation for Choosing this Organisation

Explain why you selected this organisation.

My motivate behind choosing my dad's business is purely based on, I'm wanting for it to succeed even more, get to an even bigger audience (customers) and tackle even bigger projects from other cities in South Africa, with a website this could be possible. Users using the website would be able to see his previous jobs/projects he did, his contact details would be there and where the business is located in the Eastern Cape as word of mouth can only do so much.
